HOME

- Highly accurate and reliable
- Easy handling
- Fast and flexible
- 2 years continuous operation with one set of batteries

- Have you been considering measuring your home or your workplace for radon for a long time?
- Have you hesitated because of time consuming methodologies?

The **Corentium Home** digital radon monitor provides you with continuous radon measurements. You can read the short term and the long term averages yourself and quickly and easily determine if your home is safe or if your radon mitigation measures are efficient.

Corentium Home is a radon monitor for homeowners, workplaces and public buildings. This is the radon monitor for everyone. Just install the batteries, and the *Corentium Home* does the rest!

Corentium Home gives you the possibility to read the average value for 1 day, for 7 days, and accumulative for the last year. Being battery powered, the monitor can easily be moved around the building, in order to get the full overview of the radon in the home, the workplace, the school or in the kindergarten. Compared to traditional technology, *Corentium Home* makes it much easier to locate the radon entry in the buildings. If the radon level is above the national action level, you can easily read the effect of simple mitigation measures, before you may have to consider more comprehensive mitigation actions by professionals.
